PROFESSIONAL SUMMARY

IT and Business student at QUT (Computer Science & Finance) with hands-on experience bridging technical and financial domains, from processing NDIS invoicing at Armia to building data tools for the ASX. Strong analytical thinking, high attention to detail, and a genuine interest in how AI and emerging technology are reshaping how organisations operate.

WORK EXPERIENCE

Mar 2026 · Present

Business Support Officer, ARMIA

Sunnybank, QLD

- Managed NDIS invoicing and financial records for a registered disability provider, ensuring compliance with funding guidelines and internal controls across high transaction volumes.
- Produced digital marketing content including social media posts, promotional materials, and campaign assets, increasing participant engagement for an award-winning NDIS organisation.
- Supported finance and IT operations simultaneously, handling data entry, system troubleshooting, and reporting in a dual-function role.
- Managed external communications with suppliers, partners, and community organisations, maintaining relationships critical to smooth service delivery.

Aug 2025 · Apr 2026

Crew Member (Casual), Hungry Jack's

Browns Plain, QLD

- Delivered fast, accurate service during high-volume periods while upholding quality and food safety standards.
- Collaborated with a team of 10+ to maintain workflow efficiency during peak shifts, stepping in across stations as needed.
- Handled customer concerns on the spot, consistently turning complaints into positive outcomes.

PROJECTS

2025 · Present

ASX Stock Screener & Portfolio Tracker

Python, Flask, SQLite, Chart.js

- Built a full-stack web application that pulls live ASX price data via Yahoo Finance, stores it in a local SQLite database, and serves it through a REST API to a browser-based dashboard.
- Implemented financial risk metrics from scratch including Sharpe ratio, max drawdown, annualised volatility, and moving averages, making the tool genuinely useful for retail investors and analysts.
- Designed a dark-themed dashboard with Chart.js for interactive price charts, a watchlist, and a filterable screener table, combining frontend development with core FinTech concepts.

EDUCATION

Jan 2025 · Present

Bachelor of Information Technology (Computer Science) and Business (Finance), Queensland University of Technology

- Achieved high academic distinction across all completed coursework
